

WINE LIST

The list has been carefully developed to offer interest and value. It is in three sections:

Sparkling wines - a wide range, with the best of the champagne houses, but consider too some really well made fizz from elsewhere.

Angel-selected wines - wines by-the-glass, plus other recommendations, with the emphasis on honest good flavours.

Reserve selection - often more esoteric drinking, not necessarily more expensive, but including some world-class estates. Note we are not impressed by just a famous name, the quality has to match.

There are some of the greatest winemakers including Kevin Judd (Greywacke), Pieropan, Phil Sexton (Innocent Bystander). We also have a vertical collection of Wynn's John Riddoch (one of Australia's finest).

Ancre Hill Estates

WALES

Ancre Hill is a family owned vineyard and winery above the local market town of Monmouth. Richard Morris and his wife Joy planted the first vines over 10 years ago with Pinot Noir and Chardonnay intended for use in sparkling wine. Subsequently they have planted a little Triomphe and Albarino and extended their vineyard to planting a further 5 hectares the other side of the town. The vineyard is now certified as biodynamic the first in the UK and the vineyard and cellar work are now overseen by Richard and Joy's son David, one of the most talented growers in the country. The cellar, constructed of compressed straw bales and lime render, is set up to recycle as much as possible, and most of the plants required to make the biodynamic preparations are grown on site. This is a seriously impressive operation and made all the more so by David's laser focused attitude and vision. The sparkling wines are very impressive, worthy of a seat at the top table, and the still wines have freshness, a lightness of touch and complexity. This is a truly visionary estate.

- 202 ANCRE HILL ESTATE TRIOMPHE PET NAT NV £40
An unusual wine in that it is red, and fizzy, but is made like a white wine. This is because Triomphe is a red juiced variety. The fizz comes from a little bottle fermentation prior to release. The unusual herbal and blackberry fruit make for a great aperitif or a match for game.
- 203 ANCRE HILL ESTATE PINOT NOIR CHARDONNAY ROSE 2012 £54
Produced from the small vintage of 2012 this is developing into a complex and delicious sparkling rosé with delicious tangerine and rhubarb notes underpinned by pure red summer fruit.
- 304 ANCRE HILL ESTATE ROSE 2015 £40
Only 900 bottles of the 2015 Rose were made from the second pressing of the Blanc de Noir fruit. It is fermented and aged for two years in a concrete egg and was bottled without additional sulphur in May 2018. The wine is light-footed and refined, with scents of red currant, mandarin and spice. The palate is fresh and citrusy, with a cool refreshing finish.
- 416 ANCRE HILL CHARDONNAY 2014 £42
This is a wine that typifies the energy and finesse of the estates wines. It is still very much in its youth and once opened and allowed to breathe, shares similarities to Chablis, albeit in a lighter frame. The wine is barrel fermented and aged on the lees for 18 months prior to bottling.

EU ALLERGEN WINE ADVICE

Under recent EU legislation we are required to inform you of food and drink we sell that has a sulphur dioxide (sulphites, SO₂) content above 10mg. per kilo or litre.

Sulphites are present in almost all wines, as a preservative. It is used in winemaking (and indeed most food industries), because of its antioxidant and antibacterial properties. SO₂ plays a very important role in maintaining a wine's freshness.

Without it, most wines would not keep. We have checked our wine list and the labels, and all except the Cazes muscat wines state that sulphites are present, as they must above 10mg. levels. 'Organic' wines usually have no added sulphur dioxide, but it is created naturally anyway in the fermentation process.

The actual amounts in each bottle we don't know, but as a guide the average is about 80mg./litre. Red wines need less sulphites, and an average of about 50mg. is likely. White wines more, around 120mg., and sweet white wines especially, with up to 350mg. per litre.

But see this in context. Other foodstuffs can contain larger amounts of sulphites, especially dried fruits, like raisins and sultanas, which have a 1,000mg./kilo level. And there is no medical research data showing that sulphites cause headaches, which some believe. However, severe asthma sufferers in particular must be careful.
